

Charge into the future with Envari's electric vehicle charging solutions

The sales of electric vehicles (EVs) are on the rise. Consumers are favouring more sustainable lifestyles making now a vital time to future-proof your building.

Why Envari?

Our industry-leading EV charger solutions involve the latest technology and expertise. We design and install EV charging equipment in a manner that is simple, scalable and seamless.

What you can expect from us:

Preferred pricing from some of the best equipment manufacturers in Canada

Flexible financing and maintenance package options

Real-time charging station monitoring

EV readiness assessment (EVRA) that prepares your building for EV charging

Tenant sub-metering and ownership models

Revenue-sharing opportunities

Research and delivery of any available funding opportunities and incentives

Options available to you

Envari offers turnkey EV charger solutions. We take care of everything from the initial EVRA through to procurement and installation. We also provide options for power sharing, networking, and maintenance. You can count on us as your one-stop-shop for all your EV charging needs.

Three Reasons to Start An EV-lution

Future proof your building

Envari's smart EV charging solutions are installed to code and offer the latest technologies including power sharing. We ensure your building has the long term capacity to support growth.

Enhance your competitive edge

Preparing your building for EVs will not only make your building greener, but also make your building more attractive to tenants. Envari's turnkey solutions deliver peace of mind to condo associations and building owners.

Enjoy flexible options and the best possible chargers

Whether you choose to rent, finance, or purchase chargers, you will receive the EVRA at no-cost and have access to the best Canadian-manufactured EV chargers available.
