

Your energy solutions partner

Let's face the future **with optimism.**

The energy world is **changing**.

And not just here in Ontario. With a race to fight climate change, we're on the cusp of an unprecedented global shift, with no one left untouched.

Decarbonization, decentralization, digitization, diversification and demographics – the energy landscape is being redefined by a new set of terms. It's a new frontier, but for many businesses, utilities and municipalities, it can be an intimidating one.

Everyone has questions. Everyone has concerns. And everyone's struggling to balance their energy and environmental objectives with their fundamental business outcomes. It's a jungle out there. Understandably, with so much pressure to modernize, optimize, electrify and otherwise, it can be hard to keep up – let alone know where to start.

At Envari, we pride ourselves on being at the forefront of change, helping our communities connect, our businesses adapt and the planet restore its balance. With decades of experience delivering tailored, innovative energy solutions, we're committed to bringing our clients the trusted advice they need to plan for tomorrow.

The world won't stop changing. Together, we can identify the practical, cost-effective steps to help you change with it.

Talk to us and let's get started.

Who we are

Envari is a leading energy solutions provider to municipalities, commercial and industrial clients, governments and utilities across Eastern Ontario. We help businesses navigate the complex world of energy and lead them towards a smart energy future.

To assist our clients in saving energy, enhancing their financial performance and preserving the environment, we design and implement innovative electrical, mechanical and lighting solutions. These include energy transformation projects, green building initiatives, carbon reduction plans, building automation systems, indoor and outdoor lighting solutions, electric vehicle chargers and infrastructure, electrical capacity assessments, replacement of boilers, chillers and electric vaults, HVAC services and more.

At Enviri, we understand that every project has its challenges, but not every business leader or organization has the time or resources to see them through. That's where we come in. We do the heavy lifting from start to finish or simply fill in the gaps as needed. We're flexible. Whatever the job calls for, we bring the proven knowledge and experience to deliver transformative results. We also help our clients leverage any and all available grants and incentives. More importantly, our clients count on us to protect their interests, provide unbiased advice and recommend the best-fit solution every time.

Dedicated to you.

A harmonious union
flowing through the region.

Group of companies

As a subsidiary of Hydro Ottawa Holding Inc., we're the trusted and preferred energy solutions provider to municipalities, commercial and industrial clients, governments and utilities in Eastern Ontario.

Hydro Ottawa Holding Inc. is a private company wholly owned by the City of Ottawa and whose core businesses are energy, electricity distribution, renewable energy generation, telecommunications and utility services.

We're a well-established partner in the community, committed to powering a smart energy future.

The background is a deep, dark green. A bright, glowing white arc, resembling a horizon or a path, curves across the lower half of the image. Several tropical leaves, including palm fronds and broad-leafed plants, are silhouetted against the background, some appearing to frame the central arc. The overall mood is mysterious and adventurous.

It's a jungle out there.
You need someone you can trust
to help guide you and lead the way.

You've got a business to run.
Leave the energy stuff to us.

Advisory services

Today, organizations are taking action to improve operational resiliency, increase energy efficiency and reduce their carbon footprint in an effort to combat climate change. Many of the largest companies in the world have set some sort of climate change, carbon neutrality or net-zero target. These actions are having a snowball effect in the business world, and net-zero commitments are now becoming mainstream.

As more organizations announce ambitious targets, business leaders are left scrambling to find creative ways to achieve these goals. Some business leaders have the data they need, but don't have a plan and don't know where to start. Others have set ambitious targets and are concerned about missing key milestones, letting down their customers and investors.

When it comes to one of the most complex corporate priorities of our generation, and generations to come, you don't need more opinions, you need a trusted partner who understands the energy industry inside and out.

Whether you're a small, medium or large business, we're here to help. Our energy advisory services are designed to make life easier. We'll assist in navigating the market's complexity, support your efforts to reduce your carbon footprint and increase your energy efficiency.

Our advisory services include:

- **Enviri Energy Advisor *Plus* Program**
- **Carbon Footprint Assessment**

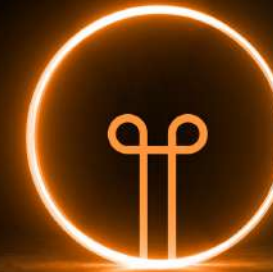

Balancing is not an act.

Finding the right balance between
business, energy and the environment.

Products and services

We offer a comprehensive suite of solutions spanning our lighting, building and electrical practices. Take advantage of our one-stop shop approach or any of our individual service offerings.

Lighting Solutions

Building Solutions

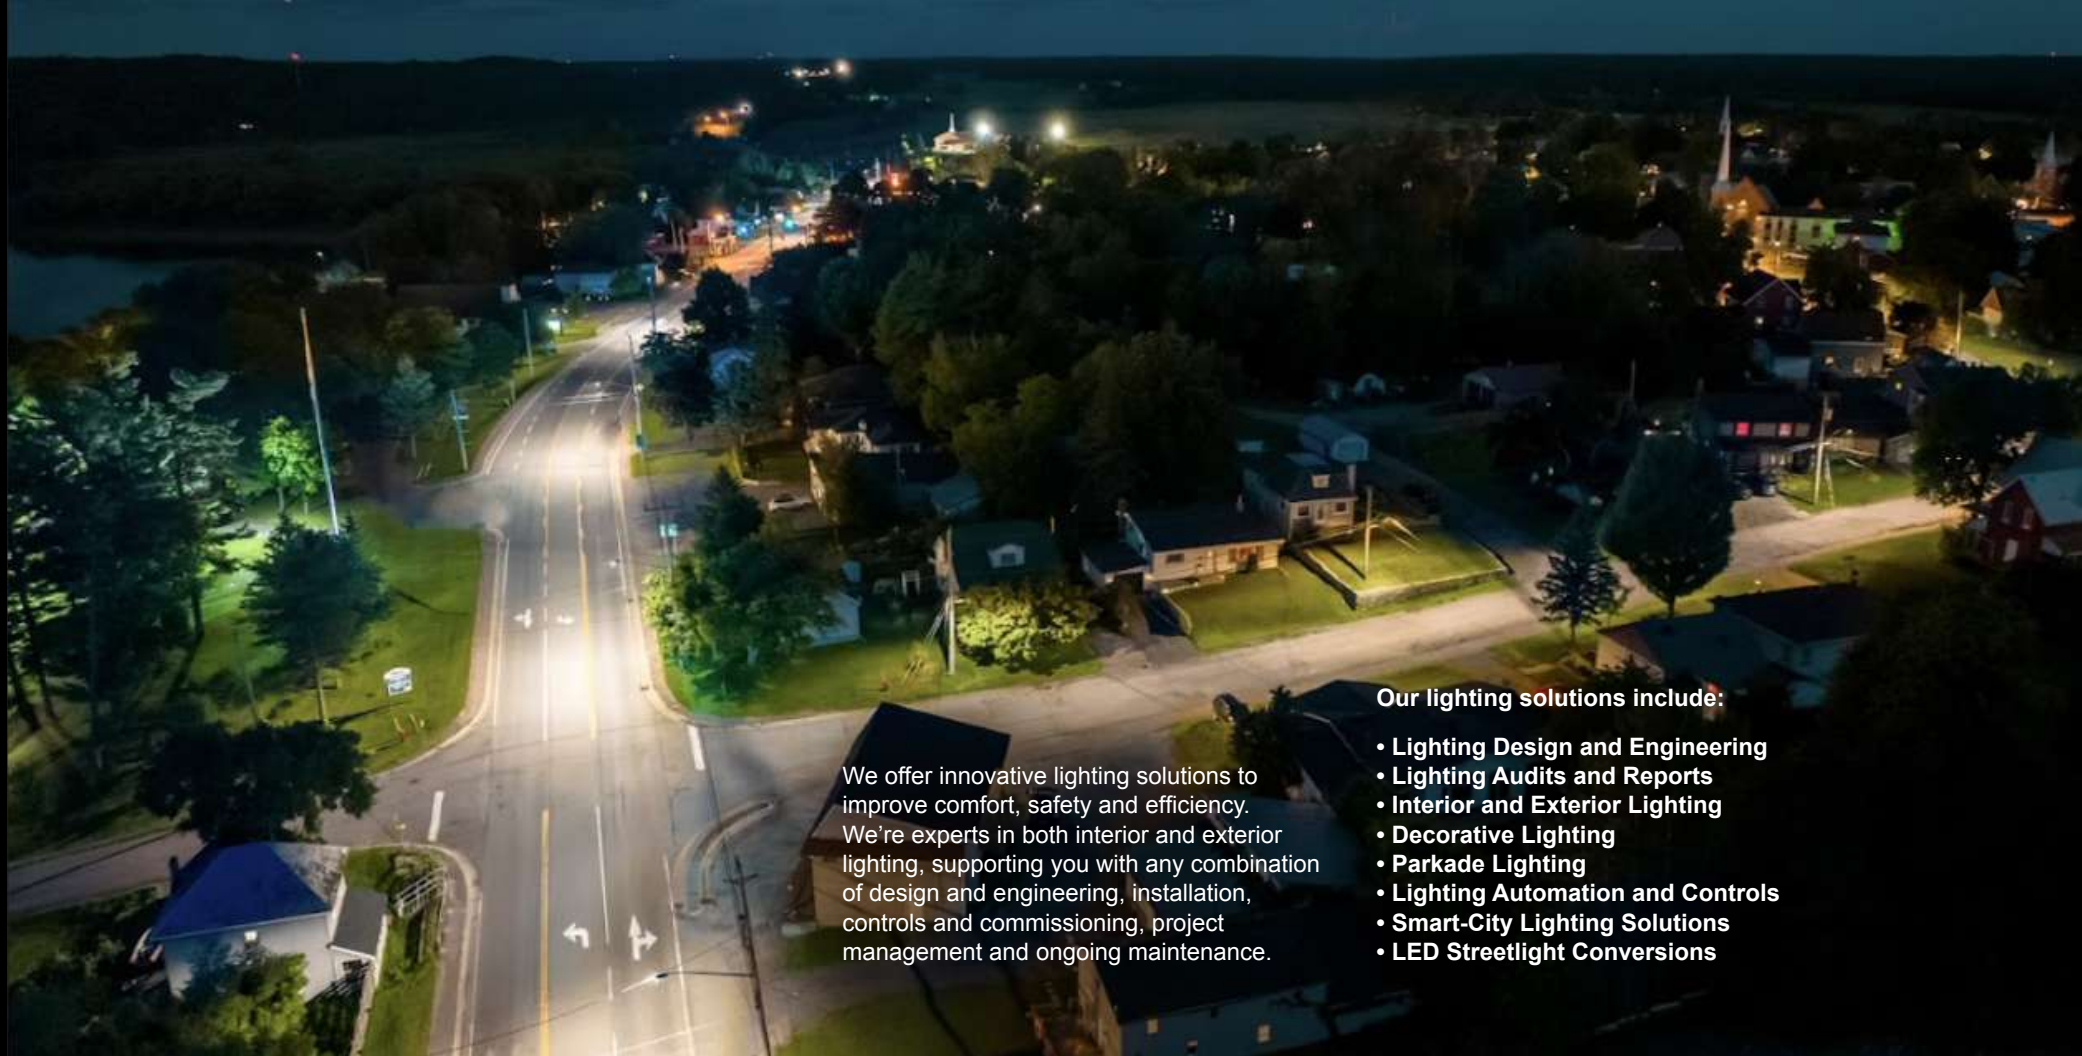

Electrical Solutions

Illuminating opportunities.

Lighting Solutions

We offer innovative lighting solutions to improve comfort, safety and efficiency. We're experts in both interior and exterior lighting, supporting you with any combination of design and engineering, installation, controls and commissioning, project management and ongoing maintenance.

Our lighting solutions include:

- **Lighting Design and Engineering**
- **Lighting Audits and Reports**
- **Interior and Exterior Lighting**
- **Decorative Lighting**
- **Parkade Lighting**
- **Lighting Automation and Controls**
- **Smart-City Lighting Solutions**
- **LED Streetlight Conversions**

Improving resiliency,
sustainability and efficiency.

Building Solutions

We offer all-encompassing building design and engineering services to improve comfort, resiliency, sustainability and efficiency. We create detailed designs, action plans, cost projections and determine energy, water, gas and carbon savings. We also manage the building and construction phases. This enables us to carry things through to completion, keeping our word and ensuring that the plans and designs are carried out as intended.

Our building solutions include:

- **Building System Design and Engineering**
- **Energy Audits and Assessments**
- **Feasibility and Lifecycle Studies**
- **Green Building Initiatives**
- **Heating Ventilation and Air Conditioning (HVAC)**
- **Cold Climate Heat Pumps**
- **Building Automation and Controls**
- **Energy Data Services**
- **Distributed Energy Resources**

**Making your green-energy
ideas a reality.**

Electrical Solutions

We apply our knowledge of emerging technologies to create cutting-edge electrical solutions, tailored to your needs and flexible for future growth. Our extensive understanding of electrical standards, rates, regulations and laws helps us turn ideas for green energy into a reality, realistically.

Our electrical solutions include:

- **Electrical Design and Engineering**
- **Electrical Capacity Assessments**
- **Electric Vehicle Chargers and Infrastructure**
- **Electrical Vaults**
 - Condition Assessments
 - Upgrades
 - Replacements
 - Ongoing Maintenance
- **Solar Photovoltaic (PV)**
- **Energy Storage Solutions**
- **Utility Suite Metering**
- **Non-Destructive Underground Cable Testing (CableQ)**

A close-up, artistic photograph of an electric vehicle (EV) charging port. A white and black charging plug is inserted into the port, which is surrounded by a glowing green circular light. The background is dark, and the scene is filled with dynamic, flowing green lines and small green dots, suggesting a high-tech, futuristic energy flow. The overall aesthetic is sleek and modern, emphasizing the theme of sustainable technology.

The future is **electric.**

**Integrity, transparency, innovation,
trust and professionalism.**

Our values

Integrity, transparency, innovation, trust and professionalism. Our values aren't just words on a wall. They're a reflection of who we are and the mission we share. Together, we live and breathe these principles as we deliver on our promises to our customers.

Our experts

We're a team of respected energy engineers, designers, project managers and business professionals who adhere to the highest standards of quality, safety and reliability. We're experienced in modernizing facilities to increase energy efficiency and reduce environmental impacts.

Our team holds several industry designations and follows internationally recognized protocols:

- P. Eng – Professional Engineer
- CEM – Certified Energy Manager
- LC – Lighting Certified
- PMP – Project Management Professional
- CMVP - Certified Measurement & Verification Professional
- CBCP - Certified Building Commissioning Professional
- LEED – Leadership in Energy & Environmental Design

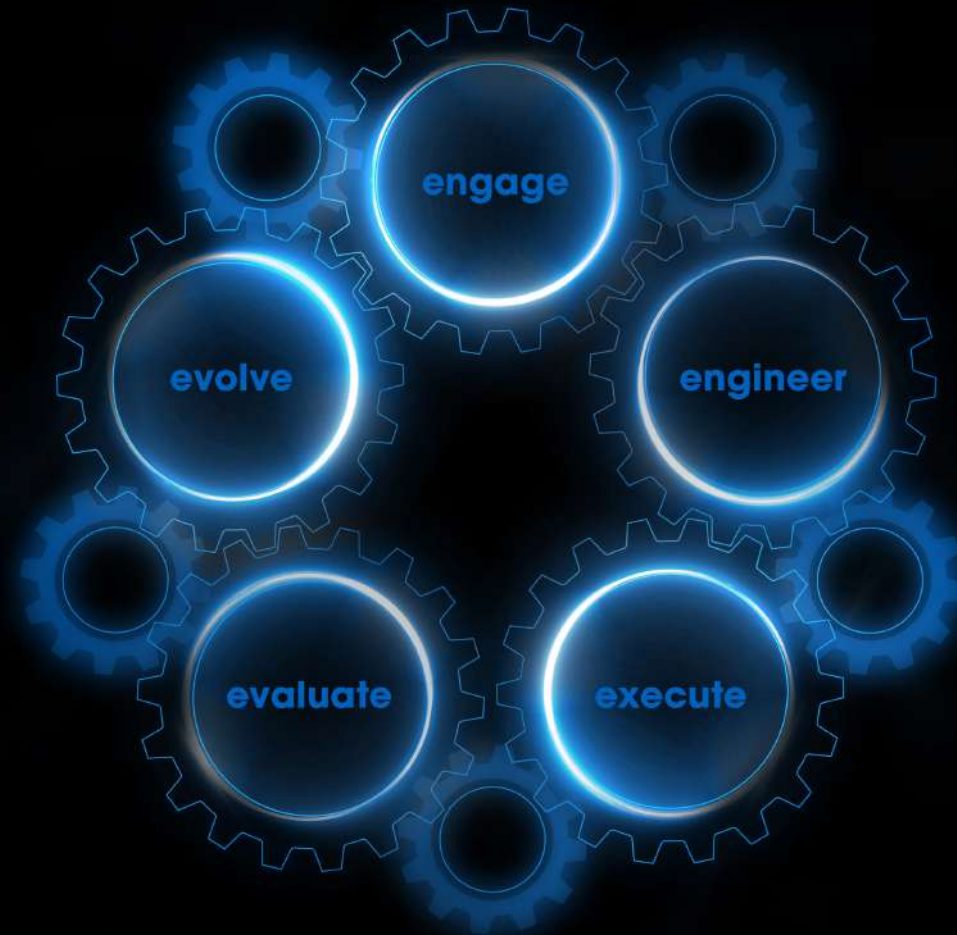

With decades of experience in stakeholder relations and flexible design, we deliver solutions that work for everyone.

Ensuring what's **designed** is **delivered**.

Our methodology

It starts with you – understanding your current and future goals then recommending the best-fit solution to achieve them. To make things easy, we manage any or all aspects of a project, ensuring what's designed is delivered as intended.

When the project is complete - we're not finished. We shift to what's next for you. Continued guidance ensures you achieve your long-term goals.

Moving beyond **words** to **actions**.

Our advantage

Trusted experts

As part of the Hydro Ottawa Group of Companies, we bring decades of energy-management innovation to every project for smarter, greener solutions.

Full transparency

We value partnerships, not transactions, which is why we're always clear on details, challenges and costs.

Integrity and education

We take the time to truly understand your vision and key drivers for success, guiding you every step of the way.

Technology agnostic

Our product recommendations are always unbiased. We focus on finding the best-fit, best-value solution every time.

Committed to quality

We adhere to the highest standards of safety and reliability. Our long-standing relationships with local contractors and vendors ensure quality from start to finish.

Energy obsessed

We put your energy savings first, finding creative ways to optimize your portfolio while reducing carbon emissions.

Driven by data

Our design philosophy promotes connected technologies and infrastructure, giving you the insight you need to better manage your assets.

One partner, one solution

From concept to commissioning to ongoing care, we can oversee your entire project or any stage within it, for simpler service and stronger results.

Your pathway to **sustainability** is clear.

Every job has its challenges, **but not every company has the experience to see them through.**

Who we serve

Municipalities and government

Governments of all shapes and sizes are feeling the pressure to do more with less. We provide a full range of energy services to all tiers of government and public corporations to help meet their challenges.

Commercial and retail

Commercial projects can have tight timelines and strict budgets. As a single point of contact, we get the job done efficiently and cost effectively, while using the latest technologies.

Utility companies

Utilities are facing the challenges of aging infrastructure and a shifting energy landscape. Demand for sustainable energy is growing, and the grid has to adapt. We integrate environmental factors while bringing reliability and stability to the table.

Industrial

Manufacturing and industrial facilities have complex design and construction needs. We plan, design and build energy solutions that optimize existing systems.

Hospitals

The conditions within a hospital or other healthcare centre can have a tangible impact on patient outcomes and employee satisfaction. Our team considers light and noise as well as air quality to ensure everyone's well-being.

Universities and schools

When an educational environment has the right ventilation, lighting and temperature, students can learn better. We design and deliver educational environments that are healthy, comfortable, efficient and promote a positive learning experience.

Multi-residential

Consumers value green living more than ever. Electric vehicles, for example, are in high demand, and so is the infrastructure to support them. Lighting and HVAC upgrades can also make your buildings more energy-efficient, sustainable and attractive to top-tier tenants and buyers.

Hospitality

Building systems can deliver greater control, accounting for fluctuating demand and shifting customer needs. We ensure amenities are adaptable, efficient and resilient with services such as building automation, electric vehicle infrastructure, advanced lighting, carbon reduction and more.

Every good story begins with a challenge.
