

Our industry-leading EV charging includes the latest technology and certified expertise required to design and install your EV chargers in a seamless, scalable, and simplified manner.

What you can expect from us:

EV readiness assessment (EVRA) that prepares your building for EV charging

Preferred pricing from some of the best equipment manufacturers in Canada

Tenant sub-metering and ownership models

Flexible financing and maintenance package options

Revenue-sharing opportunities

Real-time charging station monitoring

Research and delivery of any available funding opportunities and incentives

Where to Begin:

Electric Vehicle Readiness Assessment (EVRA)

Envari's EVRA will provide you with the information you need to make an informed decision on how to best prepare your building for electric vehicle (EV) charging. It will assess:

- + Capacity and limitations of existing service installation
- + Electrical average and peak load demand
- + Existing metering configuration
- + Secondary electrical system voltage and configuration
- + Electrical system age and general condition
- + Electric vehicle charger recommendations based on the assessment
- + Electric Vehicle charger adoption options, including:
 - Billing and energy metering options with usage and billing allocated to individual tenants
 - Recommendation and budgetary estimate for EV infrastructure and installation
 - Charger maintenance options

Charge into the future.

With Envari's electric vehicle charging solutions.

Why EV Charging?

The sales of electric vehicles (EVs) are on the rise. Consumers are favouring more sustainable lifestyles making now a vital time to future-proof your building.

Our chargers come with benefits such as:

Payment Flexibility

Our partnerships with the largest, most reputable charger manufacturers in Canada ensures you have your own account and are charged only for what you use.

Proven Expertise

With several decades of experience, our energy experts will take care of everything from design and deployment to electrical system upgrades; metering and billing solutions to installation. We'll even provide signage and painted spaces to support your BOMA BEST certification, and/or a la carte services if turnkey isn't what you need.

Financing Options

Whether you choose to rent, finance, or purchase EV chargers, our power sharing and warranty options empower you to choose the best solution for your needs.

Ongoing Maintenance

In addition to the manufacturer's warranty, Envari offers maintenance packages on all charging infrastructure. With semi-annual or annual inspections, as well as the handling of the chargers' networking and automation, you can rest assured your EV assets are in good hands.
