Building Automation Systems

Set your building up for success with world-class automation. From energy efficiency to cost savings, tenant comfort, and more – whatever your goals, discover your one source of control for managing your building's environment.

Your one source of control.

+ Keep your occupants comfortable by managing your temperature, air quality, and humidity levels from anywhere on any device

+ Easily navigate a powerful, intuitive user interface that keeps you in control

+ Stay connected to your utility meters to view energy usage in real time

+ Receive alerts when equipment is operating out of range, and proactively identify issues using fault detection and logical alarming

+ Get a thermographic view of your building's conditions by floor and zone – colour-coded to keep you in the know

+ Integrate new and existing hardware via BACnet communication to keep all of your equipment in sync

Stay in the know, stay in control.

Automating your building is one thing. Understanding it is another. With Envari, you get the customized data plotting, reporting, insights, alerts, and reminders you need to fully grasp your building's HVAC performance and take action to improve it.

"

On average, implementing a Building Automation System can cut your HVAC operational costs by up to 25%.

Aligning comfort and consumption.

Smart and flexible, our solutions are designed to transform existing HVAC systems into performance powerhouses. With 24/7 access to a mobile-optimized dashboard, you can easily manage your building's conditions – and validate them – from anywhere, any time. Better yet, leverage advanced scheduling functions to save energy based on data patterns or changes in occupancy.

Data-driven. So you can drive results.

Make smarter energy decisions with data functions including:

- Intuitive graphical control
- Smart dashboards
- Energy-usage data monitoring and storing
- Trends and scatter plot tools
- Data and trend exporting
- Real-time weather information

More ways to enhance.

With Envari, a smart HVAC system is just the start. Built on an open architecture with non-proprietary components, our systems are fully adaptive to integrate with your other building functions, including building management systems, lighting controls, fire systems, electrical subsystems, generators, and metering.

Count on Envari to help you meet your energy, environment, analytics, and savings goals. Contact us today to get started.
