

Energy Audits and Assessments

The smarter the building, the more future-proof it is

Make your building more attractive to own, operate, and lease.

Envari offers a complete range of Energy Audits and Assessments to help building owners manage energy and water consumption

The data we gather allows us to build a profile of your building's energy use and pinpoint areas of opportunity. From there, we'll make recommendations and prescribe a scope of work to reduce your energy consumption – translating into savings, return on investment, reduced operating expenditures, and benefits to the environment.

The necessary insight and actions to save energy, money and preserve the environment

Audit, Assess and Recommend

Whether you are upgrading a new build or retrofitting an old one, we can help you resolve performance issues and conserve energy.

Turnkey and Worry-Free

Leverage Enviri's turnkey solutions or take advantage of individual audits and assessments to address a specific need.

Knowledge is Power

We can help you understand your energy use and look for ways to reduce costs, raise occupant awareness and manage consumption.

A complete range of audits and assessments to help you manage your energy consumption – and save.

We can evaluate your building systems, manage energy and water consumption, raise occupant awareness, and develop a plan to reduce utility costs.

+ Energy and Water Audits

We'll help you identify and balance the energy streams in your facility to help reduce your utility costs.

+ Utility Reporting

Understand your building's consumption, allocate utility bills to individual tenants, and maximize efficiencies.

+ Feasibility Studies

Hone in on areas of interest without the need for a full energy audit.

+ Light Level Studies

Let us show you the various lighting levels of your building and where you can find savings.

+ BOMA BEST and LEED

Achieve the highest level possible for these national green building certification programs.
