

Light the way to savings

With Envari's LED streetlighting solutions, municipalities will reduce their electricity consumption, lower greenhouse gas emissions, and enjoy a fast return on investment.

Our collaboration with Smart Cities by Envari continues to show the true value of this partnership. Our integrated team works together to ensure that the project continues to improve the nightscape in the nation's capital and provides substantial energy and cost savings.

Greg Sergeant, Program Manager,
Signals & Streetlighting, City of Ottawa

The LED opportunity

With a 4x greater lifespan than traditional streetlights, the introduction of LEDs:

- ✓ Generates 50-70% energy savings
- ✓ Reduces your carbon footprint
- ✓ Provides 30-60% maintenance cost savings
- ✓ Displays a visible commitment to efficiency
- ✓ Offers a lucrative 4-7 year, 15-25% return on investment

The bottom line

Through our ability to provide financing, municipalities enjoy a low risk investment that pays for itself through the long-term savings it generates.

Your municipal budget remains untouched, and your residents are financially unaffected by the shift towards LEDs.

Why Envari?

Envari's design philosophy promotes smart-connected infrastructure, providing municipalities with full control of their assets while enhancing their communities. Our industry-leading solutions are delivered by a dedicated team of experts who are committed to your success from assessment and installation through to support and the exploration of added value opportunities. **We have:**

- + **100+ years** combined experience on exterior lighting and streetlighting.
- + Successfully executed more than **55,000 LED streetlight conversions** for both large and small municipalities.
- + Secured over **\$6M in incentives** for our clients.
