

## Tailored services for OECM members

Selected through a rigorous competitive sourcing process, Enviri is now a preferred vendor for members of the Ontario Education Collaborative Marketplace (OECM).

Not sure where to start?  
We've got you covered in three key areas.

1

### Lighting Consulting Services

Whether you are looking to retrofit or enhance, Enviri can provide specialized solutions for all of your lighting needs:

**Lighting Audit:**

- Reviewing luminaires and lamps, placement, location, and mounting details
- Lamp specifications and measurements of illumination levels

**Lighting Retrofit:**

- Partial or complete fixture replacement strategy to meet illumination levels
- Lighting control strategy

**Lighting Design:**

- Preparing and providing specifications, recommendations and drawings services (AutoCAD and PDF format)

**Related Services:**

- Calculations of energy savings and carbon reductions for reporting requirements
- Control strategies and equipment
- Commissioning, measurement and verification services
- Project management and procurement
- Lighting Standards

2

### Facility Project Management Services

Let Enviri's licenced project professionals take care of your project management needs:

**Facility Management, Maintenance and Construction Management Services:**

- Contract administration and construction management for major renovations, repairs and new construction
- Licenced project professionals
- New construction projects, additions & combinations of multiple sub-projects
- Break down of more extensive projects into smaller, manageable work packages

**Customer Services and Support:**

- Procurement and close-out support
- Integrated facility project management
- Planning and design support

**Additional Services:**

- Building systems, design, maintenance, and replacement
- Capital project planning
- Cost management services
- Lifecycle planning

3

### Real Time Utilities Monitoring Services

With our cloud-based software (SaaS), OECM facility managers can now have access to real time energy data:

**Utility Monitoring:**

- Consolidate, compare and benchmark data for multiple utilities across multiple sites

**Consumption Tracking:**

- Consumption tracking for whole-building, sub-metering and functional zones

**Load Profiling:**

- Utility consumption tracking plotted for various time periods

**Utility Dashboard:**

- Configurable dashboards to view building utilities' consumption performance

**Health & safety compliance:**

- Compliance with Ontario Building Code (OBC) and internal H & S policies

**Additional Services:**

- Installation & technical support

## What to expect

Envari's team of project managers, designers, engineers and business professionals will provide OECM members with a full suite of services. We'll leverage our specialized knowledge, proven project management skills, and years of successful project management execution to help OECM members lower operating costs, save energy and reduce their carbon footprint.

## Why work with Envari?

- ✓ **Trusted experts**  
As a Hydro Ottawa company, we bring decades of energy innovation to every project for smarter, greener solutions.
- ✓ **Energy obsessed**  
We put your energy savings first, finding creative ways to optimize your portfolio.
- ✓ **Integrity and education**  
We take the time to truly understand your vision and key drivers for success, guiding you every step of the way.
- ✓ **Driven by data**  
Our design philosophy promotes connected technologies and infrastructure, helping you better manage your assets.
- ✓ **Technology agnostic**  
Our recommendations are always unbiased. We focus on finding the best-fit, best-value solution every time.
- ✓ **Committed to quality**  
Our high safety, reliability and partnership standards ensure quality from start to finish.
- ✓ **Full transparency**  
We value partnerships, not transactions, which is why we're always clear on details, challenges and costs.
- ✓ **One partner, one solution**  
From concept to commissioning to ongoing care, we can oversee your entire project or any stage within it.

Cut through the confusion and get the energy solutions you need, all in one place.
