

Carbon Footprint Assessment

Your first step in effective carbon-reduction.

Carbon-confused?

We get it. Businesses are facing mounting pressure to decarbonize their facilities. This is an ongoing challenge complicated by competing priorities, an intimidating learning curve, and a lack of time or resources. It can be hard to get the ball rolling.

Every journey has its starting point and sustainability is no different. Carbon action requires carbon insight, which is why it's critical to start with a sight line into your building's emissions.

The path to sustainability starts here.

1

Carbon Footprint Assessment

2

Project design and costing

3

Implementation

4

Ongoing tracking performance management

5

Offset selection

It all begins with data

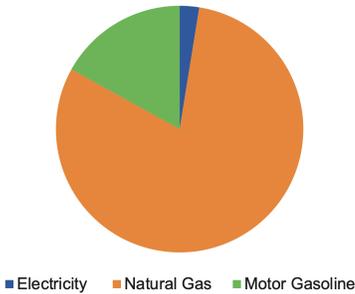

Your Carbon Footprint Assessment will give you a clear picture of your carbon emissions, measures you can take to reduce them and their estimated savings.

You've got questions. We've got answers.

How much carbon does my business produce?

We'll give you a clear picture of your energy consumption and spend, translated into Scope 1 and Scope 2 carbon emissions.

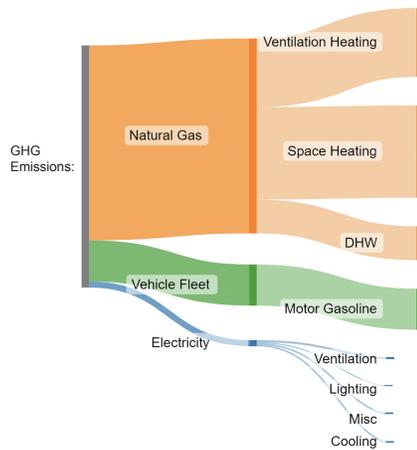

Emissions (tCO₂)

Where and how does my business produce its carbon?

We'll show you where your carbon is coming from – broken down across your core lighting, building, electrical and fleet.

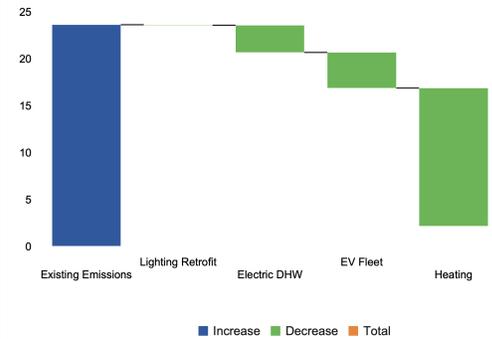

GHG Emissions

How can I reduce my carbon footprint?

We'll identify which measures will have the greatest impact, including their estimated savings. We'll also assess your electrical capacity, so you can know what you're working with.

Emissions Reduction (tCO₂)

Where data meets guidance

Your Carbon Footprint Assessment is only helpful if you understand it. That's why we deliver a comprehensive report and take the time to walk you through our findings, insights and recommendations, making it easy for you to act on them. We'll stay with you every step of the way.

Why work with Envari?

- ✓ **We get it and can do it**
At whatever stage you're at, you'll benefit from expertise that spans the full spectrum of related work, and from design that's informed by real-world experience.
- ✓ **We know electricity, inside and out**
A sustainable future is just a dream without a reduction in fossil fuels. As part of the Hydro Ottawa Group of Companies, we understand low-carbon infrastructure, electricity load, electrification of transportation, and grid connectivity like few others.
- ✓ **We're on this journey with you**
Like all Hydro Ottawa companies, we're committed to achieving net-zero emissions within our own organization by 2030.
- ✓ **We understand Ontario**
Reducing greenhouse gas emissions is a global ambition but has to be achieved with locally-rooted strategies. Policies are ever-changing. Like energy markets and mixes, and electricity carbon intensities, they vary dramatically across jurisdictions. We're experts in ours.

Take the first step in cutting your carbon footprint.
